What Is Experience SYNCRA ?

SYNCRA CITY

SYNCRA City is an interactive exhibit that merges Music, 3D Animation, Visual Projections, High-Technology, and Immersion to create a futuristic cyberpunk city that lives in a constant state of flow between each of its neighbourhoods and the music beat that fuels the city.

The immersive experience and the interactivity are felt everywhere. Every colour, shape, or music beat is in perfect sync, and everything moves beautifully as the guests interact with each of the city's neighbourhoods, creating a unique futuristic cityscape.

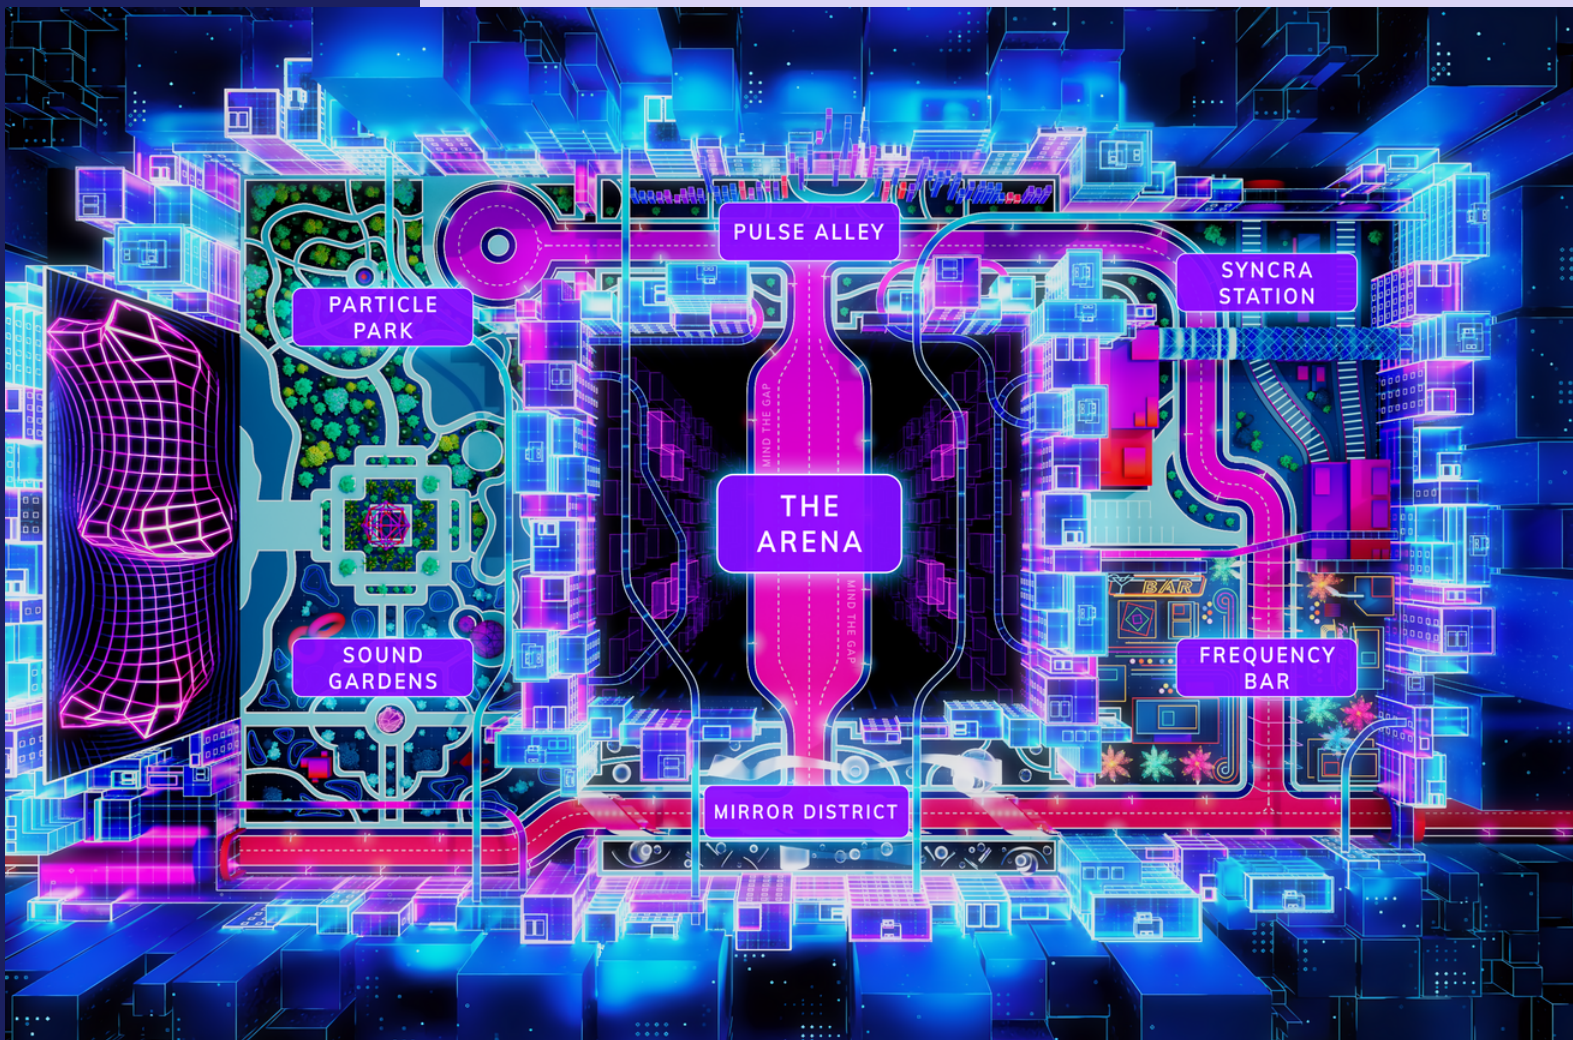

The city uses top-notch technology such as Projection Mapping, Spatial Augmented Reality, and Complex Interactive Games that will deliver a unique visual and immersive experience.

This is an excellent opportunity to visit and witness the potential of technology implemented in art and entertainment.

Food and Beverages are available for purchase inside the venue*
